# **DIA SHAMAN TABLET – Food Supplement to enhance Life Style Disorders**

60 tablets packed in a sealed container with MRP 450/-

It took 4 years to convert Liquid Dia Shaman into Tablet form. The powder form was not user friendly, and tablet form was not getting disintegrated easily. With the help of couple of Ayurveda MD Doctors the formula was established, and is being in the use since 2022. The tablet punching is done at 3rd party location in Udupi (Karnataka).

Before sending the raw material, all the ingredients get purified, sorted and mixed as per the formula and sent for final punching.

# DIA SHAMAN

**Formulation: Available in Tablet & Liquid Form**

## 1. Timeline of Expected Results

Patients can expect the following progression of health improvements during the course of treatment:

**Initial Phase (First 15 Days)**

- **Appetite & Digestion:** Within the first 15 days, patients will experience increased appetite and improved digestion capabilities.
- **Knee Pain Relief:** Significant relief from knee pain (if present) is typically observed within 8 to 10 days.
- **Back Pain Relief:** Recognizable improvement in back pain is expected within 10 to 15 days.
- **Neuropathy Relief:** The sensation of "foot burning" begins to repair and typically vanishes within 10 to 15 days.

## Long-Term Therapeutic Benefits (3 to 12 Months)

- **Blood Sugar Management:** After 90 days, blood sugar levels are expected to reduce by 50% to 77%.
- **Natural Weight Management:** Over a period of 12 months, patients may experience natural weight reduction of up to 10 kgs, specifically if the patient is currently overweight.

## 2. Post-Treatment Protocol

Transitioning away from modern medication and maintaining long-term health.

- **Reduction of Modern Medicine:** Gradually, within 6 months to 1 year, patients consuming the tablets can begin to reduce and eventually cease dependency on modern medicines.
- **Clinical Results:** During this transition period, average blood sugar test results (Random Blood Sugar [RBS] or HbA1c) are expected to remain favorable and within optimal ranges.
- **Maintenance Dosage:** Once health goals are achieved, continued use of "Dia Shaman" is not necessary. However, as a precautionary measure, one may use the product occasionally for 5 to 10 days per month.

## 3. Safety Profile & Dietary Recommendations

- **Side Effects:** As of data recorded in July 2025, there have been no reported side effects.
- **Dietary Advice:** Ayurveda practitioners strongly advise including Ghee in the regular diet while using this product to manage body heat and ensure optimal absorption.
